### **Johnson Hardware's Innovative Pocket Door Frames Can Make Any Room Bloom with Bold Style**

Interior doors have all too often been relegated to "wallflower" status when it comes to home design, seldom noticed and rarely admired due to their utilitarian nature and function. But times are changing and so are interior doors, thanks to Johnson Hardware®, manufacturer of a complete line of superior-quality sliding, folding, and pocket door hardware for residential and light commercial applications. With Johnson Hardware's decorative, innovative Pocket Door Frames, homeowners and interior designers can make any room bloom with eye-catching materials and styling, enhancing home spaces in a variety of unique and unexpected ways.

Transplanting the passive, nondescript "wallflower" doors found along the interior walls of most homes with bold, compelling designs is simple with Johnson Hardware's Pocket Door Frame, which can create stunning entryways and seamless transitions within and between rooms. Not only is the Pocket Door Frame an economical and space-saving replacement for the traditional, hinged swing door, it lets you add surprising design accents that distinguish rooms, such as elegant stained glass, hand-carved wooden paneling, sleek European shapes, Colonial glass lites, "Arts and Crafts" styling, and even dramatic transoms. The Johnson Hardware® Pocket Door Frame opens up an inspiring new world of design possibilities for virtually every area of the house, beautifying dining and living rooms, master bedrooms and baths, kitchen spaces and pantries, and even laundry/utility areas.

By essentially creating a sliding “door-in-the-wall,” which consumes no room real estate, the versatile Johnson Hardware® Pocket Door Frame makes it a breeze to expand rooms and hallways into grander or more private spaces, depending on personal tastes and design goals. For example, a double Pocket Door Frame can shape a dramatic entrance to an entertaining area, which serves as a great conversation starter for party guests and creates a natural flow of foot traffic between rooms. The Pocket Door Frame can even expand doorways to meet Universal Design standards, enhancing everyone’s quality of life in the home by improving room-to-room accessibility while offering the benefits of traditional doorways, including privacy and noise reduction.

With sizes for doors up to 5 feet wide by 9 feet high, Johnson Hardware’s Series 200 Pocket Door Frame holds an impressive 300 pounds of door weight and can accommodate a door panel depth of 1-3/4 or 1-3/8 inches. This robustness and flexibility makes it easy to choose decorative options, such as ornate Asian hand-carved panels, rustic wrought iron accents, and architectural glass.

For more information about Johnson Hardware® Pocket Door Frames and other L.E. Johnson products, or to locate a dealer, call 1-800-837-5664 or visit [www.johnsonhardware.com](http://www.johnsonhardware.com).
